It is very fun i would recommend it if you like mazes.. So far, so good. Lots of secrets to be found, all sorts of rules for all sorts of leagues. Hidden gem? I think it just might be, after all it is still Early Access and already more fun then some Triple A titles.. After the awesome that was Panzer Elite, the addition of the work "Action" to the title is a sad step backwards.

The missions are very linear and very repetitive, with no opportunity for long range spotting or gunnery for the most part or room to maneuver, but it doesn't matter. The enemy AI will blindly and foolishly charge you with a suicidal enthusiasm and their tanks never seem to be a match for yours.

All the cool penetration and damage mechanics are gone, replaced by a simple hit point style system.

There is no system for modifying your vehicles and repairs and rearming are arcade-ish.

If you want a light game that requires no thought and happens to feature armor this might be good for a few hours of distraction. If you are looking for something like the original Panzer Elite, you might consider something more along the lines of T34 vs. Tiger.. you need to activate the dlc, to get the code you have to buy the dlc, then on the right (depending on your steam display) right click on the crew and you will see the cd code, all you need to do is enter that into uplay. This game needs a lot of work. When I was playing I admitted I wouldn't remember all the keys because they were just so random and a weird selection, H to come out of the closet R to use your flashlight in my opinion that's just weird for me.

I seen to have all the keys I need but I can't open the rest of the rooms.

Also sometimes my character seems to be being pushed all the time.

I like the fact that you can save the game but that's about it for me.

https://youtu.be/zBcP-dCDpxs. Short but entirely satisfying. Extremely pretty, too, The gameplay is a neat mixture of snake and "eat to grow" games.. it's okay of a game but theres no save feature. The game is almost good. Hit boxes need improved. I often have a round where I loose 4 or 5 shots because I shoot the ball through the same can over and over again, without it registering as a hit. My score is also stuck, so I can not purchase any more types of balls to shoot. Fix these two things and I will recommend this game and change my review.

. It's Arcen Games' vastly under-rated puzzler. Cross-platform, reasonably priced, challenging, a horse and cart load of game modes, cathartic and deserving of one of Gamespot's longest reviews of this or any millenium, although its an invocation of poisonous sarcasm:

"It can be a lot to take in at first, but a player who perseveres would find this interface quite simple to use." -- Gamespot.

I bought a retail boxed copy, today, because somehow this title deserves to physically sit tall and proud on a shelf. I now own 3 copies.

This should not be sold separately.. Looks like each player starts with the same 7 chips (cards), plus three character-specific special move chips. At the beginning of your turn an ante gem is added to your pool. At the end of your turn you buy a chip from a custom or random bank that is shared by all players. Use the chips you buy to keep your gem pool the lowest and then KO someone else at 10+. I'm having fun with the 4-player AI battles. Thanks for the Linux version!. One of the best games of this genre. The player is waiting for an interesting journey through the countries. Beautiful graphics, interesting plot and pleasant to the ear music. I definitely recommend. very short, very glitchy, not fun.. Too frustratingly difficult/annoying. I really like this game, true it doesn't feel finished but i still really like it, it isn't that expensive either, i hope the devs finish the game, its a survival game in space there are no jumpscares, i find it relaxing combing through a ship or station looking for resources, there is a lot to do you have to like the grind build your base to ridiculous proportions find reserch points to level up skills, and i found an easy solution for the lock problem you have to look at them from the side the rings are in a cone shape formation, oh and don, thave to many items in physical inventory or the game starts to lag (i only had promblems after i had over 100+ items in physical inventory), still i can handle te bugs but i do hope the game wil get a polishing soon.
